Professional Summary

Computer Science undergraduate specializing in web development with experience building and deploying full-stack applications using React.js, Node.js, and Express.js. Solved 100+ LeetCode problems, strengthening data structures and problem-solving skills.

Education

Bachelor of Technology – Computer Science with Artificial Intelligence

2023 – 2027

Annamacharya Institute of Technology and Sciences, Rajampet

CGPA: 8.26

Projects

Complaint Management System (Full Stack Project) – React.js, Node.js, Express.js, MongoDB

- Developed a web application to manage complaints between students and police with structured tracking and resolution.
- Implemented role-based dashboards for students and police to manage complaint workflows.
- Built RESTful APIs for complaint creation, categorization, and status updates.
- Integrated frontend and backend for dynamic data rendering.
- Designed responsive UI for seamless experience across devices.
- Deployed application for real-world usage.
- **Live Demo:** aits-student-police-portal.netlify.app
- **GitHub:** github.com/JAGADEESH349/CSEAI-CRT-Project.git

Experience

Hackathon Participant – Frontend Developer

Smart Bandobasth Project

- Contributed as a Frontend Developer in a hackathon to build a system for optimizing personnel allocation and monitoring duties.
- Designed and implemented responsive UI components for real-time tracking and visualization.
- Collaborated with team members to integrate frontend with overall system workflow.
- Developed features under strict time constraints, ensuring rapid prototyping and functionality delivery.
- Won the hackathon by delivering a practical solution to reduce duty overlap using location-based logic.

Technical Skills

- **Languages:** JavaScript, SQL, Java
- **Frontend:** React.js, HTML5, CSS3
- **Backend:** Node.js, Express.js
- **Database:** MongoDB, MySQL
- **Tools & Platforms:** Git, GitHub
- **Core Concepts:** Data Structures & Algorithms, REST API Development, Responsive Web Design

Achievements

- Solved 100+ LeetCode problems across arrays, strings, and basic data structures, improving algorithmic thinking and coding efficiency.
- Completed Data Structures and Algorithms (DSA) fundamentals covering arrays, strings, linked lists, stacks, and queues.
- Won a hackathon by developing the Smart Bandobasth project for duty allocation and monitoring.
- Served as the Frontend Developer in a hackathon, responsible for designing and implementing key UI components.
- Built responsive screens using HTML, CSS, and JavaScript, enabling rapid prototyping within limited time.
- Supported team collaboration by integrating frontend work with the overall project workflow.
